

OpenWeb.co.za Free Proxy Guide

Company: Open ISP cc Registration Number: 2005/156968/23 t/a OpenWeb

Valid until 31 October 2024

Step by Step Setup Guide

Firefox:

Here's a step-by-step guide to set up OpenWeb.co.za's free USA-based proxy on Firefox:

Step 1: Open Firefox Preferences

1. Open Firefox on your computer.
2. Click the **Menu** icon (three horizontal lines) in the top-right corner of the Firefox window.
3. From the dropdown menu, select **Settings**.

Step 2: Access Proxy Settings

1. In the **Settings** menu, scroll down to the **Network Settings** section at the bottom of the page.
2. Click the **Settings** button next to **Network Settings**.

Step 3: Configure Proxy Settings

1. A window labeled **Connection Settings** will appear. In this window, choose **Manual proxy configuration**.

2. Enter the following details:

- **HTTP Proxy:** `proxy1.openweb.co.za`

- **Port:** `808`

3. Enter the same details for the **SSL Proxy**:

- **SSL Proxy (HTTPS):** `proxy1.openweb.co.za`

- **Port:** `808`

4. If you want to configure the SOCKS5 proxy as well (optional):

- Scroll to the **SOCKS Host** field and enter: `proxy1.openweb.co.za`

- **Port:** `1080`

- Select **SOCKS5**.

Step 4: Bypass Local Connections (Optional)

1. If you don't want the proxy to be used for local connections, check the box that says **"Do not proxy for"** and enter `localhost, 127.0.0.1`.

Step 5: Save Settings

1. After entering all the proxy details, click **OK** to save the settings.

Step 6: Enter Authentication Details

1. When you start browsing, Firefox will prompt you to enter a username and password.

2. Enter the following credentials:

- **Username:** `openweb`

- **Password:** `Apple1526!!@`

3. Check the box **"Remember this password"** if you want Firefox to store it.

Step 7: Test the Proxy

Open ISP cc Registration Number: 2005/156968/23

0873508601

1. Open a new tab and visit any website to test if the proxy is working correctly. If everything is configured properly, your connection should now be routed through OpenWeb.co.za's USA-based proxy.

You are now set up with OpenWeb.co.za's free proxy on Firefox!

Chrome:

Step-by-Step Guide to Setting Up OpenWeb.co.za's Free USA-Based Proxy on Chrome

Follow these steps to set up OpenWeb.co.za's USA-based proxy in Google Chrome:

Step 1: Open Chrome and Access Settings

1. Open **Google Chrome** on your computer.
2. In the upper right corner, click on the **three vertical dots** (Menu).
3. From the dropdown menu, select **Settings**.

Step 2: Navigate to System Settings

1. Scroll down and click on **"Advanced"** to expand additional settings.
2. Under the **System** section, click on **"Open your computer's proxy settings."**

Step 3: Access Proxy Settings

This will take you to your computer's network settings, where you can configure the proxy.

1. In **Windows**, the "Internet Properties" window should pop up.
2. If you're using a **Mac**, it will direct you to your "Network" preferences.

Step 4: Configure the Proxy for Windows

1. In the **Internet Properties** window (Windows):
 - Click on the **Connections** tab.

Open ISP cc Registration Number: 2005/156968/23

0873508601

- Click on **LAN settings**.
- 2. Under **LAN settings**, check the box for **"Use a proxy server for your LAN"**.
- 3. In the **Address** field, enter the proxy host: ``proxy1.openweb.co.za``.
- 4. In the **Port** field, enter the HTTP/HTTPS port number: ``808``.
- 5. Check the box for **"Bypass proxy server for local addresses"** if you want to bypass the proxy for local networks.
- 6. Click **OK**.

Step 5: Configure the Proxy for Mac

1. In the **Network Preferences** window (Mac):
 - Select the network connection you're using (e.g., **Wi-Fi** or **Ethernet**).
 - Click **Advanced**.
2. Go to the **Proxies** tab.
3. Check **"Web Proxy (HTTP)"** and **"Secure Web Proxy (HTTPS)"**.
4. For both, enter the `proxy1.openweb.co.za` in the **Web Proxy Server** field.
5. Enter the **Port** as ``808``.
6. Click **OK**.

Step 6: Enter Proxy Authentication Credentials

1. Once you apply the proxy settings, when you visit any webpage in Chrome, a prompt will appear asking for authentication.
2. Enter the **Username**: ``openweb``.
3. Enter the **Password**: ``Apple1526!!@``.
4. Click **OK** to save the authentication credentials.

Step 7: Verify the Proxy is Working

1. Open Chrome and visit a website to ensure your internet connection is working through the proxy.

2. You can visit a site like [WhatIsMyIP.com](https://www.whatismyip.com/) to confirm that your IP address has changed to reflect the USA-based proxy.

That's it! You've successfully set up OpenWeb.co.za's free USA-based proxy on Chrome.

Kind Regards
